Waheed Oladunjoye

Technical Support Engineer

Lagos, Nigeria | +234 813 365 9658 | oladunjoye.wt@gmail.com | linkedin.com/in/waheedoladunjoye

PROFESSIONAL SUMMARY

Technical Support Engineer with 6+ years supporting enterprise fintech platforms across core banking, wallet, and ATM/POS transaction switching. Delivers L2/L3 support working directly with customers, engineering teams, and vendors. Strong in diagnosing production issues, SQL-based troubleshooting, database and data migrations, and Linux and Windows server environments. Used to prioritising multiple high-severity incidents under SLA pressure and explaining technical issues clearly to non-technical stakeholders.

CORE SKILLS

- **Troubleshooting and RCA:** log analysis, ISO 8583 message tracing, root-cause investigation, L2/L3 escalation
- **Incident management:** ITIL-aligned incident, problem, and change management; Jira and ManageEngine ticketing; prioritising concurrent incidents against SLAs
- **Monitoring:** Grafana, Prometheus, Kibana/Elastic
- **SQL and databases:** Oracle, MSSQL, Sybase; query-based troubleshooting; data migration and validation
- **Operating systems:** Linux (SSH-based deployment and monitoring), Windows Server (IIS)
- **Integration and testing:** REST APIs, Postman, UAT for bank and third-party integrations
- **Containers and cloud:** Docker; Microsoft Azure AI Fundamentals
- **Payments domain:** transaction switching, ATM/POS, Postilion suite, settlement and reconciliation
- **Communication:** customer, vendor, and cross-team coordination; runbooks and technical documentation

PROFESSIONAL EXPERIENCE

Technical Support Engineer, eTranzact International Plc

Jun 2023 - Present

- Provide L2/L3 support for core payment applications, working directly with customers, engineering, and vendors to resolve high-priority incidents within SLA.
- Resolve mission-critical application and payment-processing issues through log analysis and root-cause investigation, improving uptime and transaction success rates.
- Monitor switching, settlement, reconciliation, and transaction-processing systems with Grafana and Kibana, catching problems before they become outages.
- Supported database migrations from Sybase to MSSQL, stabilising high-volume processing and improving performance.
- Run UAT for bank and third-party integrations using APIs and ISO 8583 messaging to validate end-to-end transaction flows.
- Onboarded banks, merchants, and third-party processors onto transaction, settlement, and dispute platforms, speeding up partner go-live.
- Configure and deploy secure application environments, including settlement/dispute servers, reconciliation engines, and DR sites.
- Work with engineering, product, DevOps, and infrastructure teams to improve transaction turnaround time and platform scalability.
- Maintain operational documentation and runbooks that reduce repeat incidents and support knowledge sharing.

Technical Support Engineer, SterlingPro Business Applications

Oct 2021 - May 2023

- Configured and supported ATM and transaction switching infrastructure (download configurations, state/screen creation, keybuffer setup, response parameters) for integration with core banking and third-party systems.
- Monitored transaction flows with Postilion Transaction Manager and Source Node Simulator, isolating failures and improving transaction success rates by 15%.
- Traced message paths and interpreted ISO 8583 response codes across indigenous and third-party switching environments, cutting incident resolution time.
- Deployed and supported fintech applications on IIS, configuring dependencies and database connections, reducing configuration-related incidents by 20%.
- Maintained architecture, workflow, and issue-resolution documentation to improve support consistency.

Technical Support Engineer, Longbridge Technologies Limited

Mar 2020 - May 2021

- Supported core banking data migration: extracted, validated, and transferred data between Oracle databases using complex SQL queries.
- Deployed and monitored applications on Linux servers over SSH to keep production environments stable and secure.
- Assisted with testing, configuration validation, and dependency setup ahead of production releases.
- Took part in change and release activities, supporting stable go-lives for digital banking and transaction processing systems.

Technical Support Intern, Longbridge Technologies Limited

Oct 2019 - Feb 2020

- Supported technical teams with documentation, testing, and workflow analysis.
- Documented procedures in SharePoint, cutting onboarding time for new support engineers by 40%.

CERTIFICATIONS

- Microsoft Azure AI Fundamentals
- Oracle AI Fundamentals
- Oracle Generative AI Specialist
- Salesforce Certified Administrator

EDUCATION

M.Sc. Chemistry, University of Ibadan, Nigeria (2017 - 2018)
B.Sc. Chemistry, University of Ilorin, Nigeria (2011 - 2015)
